

- How **accurate** is your property and accounting data?
- Can you run portfolio reports in **seconds**?
- Does everyone in your organization have **access** to all the data they need?
- Do you get **alerted** to key trends and potential risks in your portfolio?

## With REQUEST Business Intelligence software from Resolve, you can turn your **data into insight** and your **time into money**

**BUSINESS INTELLIGENCE** is a more comprehensive solution than asset or property management systems.

### Request...

- **Transforms** silos of property, budget, accounting and market data into a single validated data source accessible to everyone at any time.
- **Automates** routine reporting, allowing you to run reports in seconds at the touch of a button.
- **Compares** budgets, actuals, reforecasts and underwriting.
- **Customizes** reports, dashboards and notifications for each user.
- **Alerts** you to issues and risks, then lets you instantly drill down to property-specific data.

“Request will allow our managers and senior executives to easily view data from multiple sources in one place, speeding our reaction time, increasing our productivity and enabling us to further improve returns for our investors.”

**Steve Bremner**  
Chief Financial Officer  
Kennedy Associates  
(now Bentall Kennedy)
