

AIRWAVZ SOLUTIONS, INC.

Connection When It Matters Most

With consumption of mobile communication continuing to grow, in-building wireless connectivity is essential. At Airwavz, we fund, build, own, and operate 5G-ready, fiber backbone wireless infrastructure platforms as a service for building owners and tenants. With a focus on Commercial Office, Healthcare, Hospitality and Multifamily properties, we help building owners solve their in-building connectivity challenges. It is our goal to provide wireless connectivity solutions that are affordable, dependable, and future-proof. It's what we call **Building Mobility™**.

AIRWAVZ SOLUTIONS:

IN-BUILDING CELLULAR

WI-FI

SMART BUILDING TECHNOLOGY

PRIVATE LTE/5G NETWORKS

CLIENT BENEFITS:

- + Seamless coverage throughout the entire campus
- + Increased cellular capacity to keep up with demand
- + Enhanced tenant satisfaction and user experience
- + Scalable technology to support tenant services

CLIENTS WHO TRUST US:

"We went with Airwavz because they are going to maintain the system and upgrade it as new technology becomes available. We want to make sure we've got the best coverage possible, so we have happy tenants and happy residents out there." - Ryan Lemaster, Billingsley VP of IT

AIRWAVZ DIFFERENTIATORS

CARRIERS GUARANTEED

At Airwavz, we have Master Services Agreements with all major wireless carriers so that we can guarantee the carriers of your choice will be active and on-air, and we put it in writing.

TECH THAT'S NEVER OBSOLETE

With Airwavz' service, technology refresh is included through the term of our agreements, at no incremental cost to our clients. Our systems are never obsolete.

FLEXIBLE ECONOMIC MODEL

Whether you would like to invest in infrastructure as a capital expense or prefer operating expense as the means to fund your network, Airwavz has developed financial models that accommodate both.
