TRANSFORM YOUR BUILDINGS
with innovation.

GROW YOUR BUSINESS
with insights.

Building Clarity powered by SAS, the world's leading analytics provider, is a combination of software-as-a-service tools and services to help you optimize your building performance, saving you both time and money.

Tighter budgets, aging infrastructure, and higher energy costs demand a different way of thinking about your building's operation and maintenance. With Building Clarity, you can expect to reduce your energy cost by 5 – 25 percent.

MONITOR

Experience real numbers in real time.

- Quickly view when your mechanical systems are operating outside of their expected norms
- Get real-time alerts—directed to the right people—whenever issues require maintenance

MEASURE

Explore the power of data.

- Predict energy consumption and assess the cost savings of interventions based on historical trends
- Compare ROI of competing alternatives when there are multiple opportunities for improvement
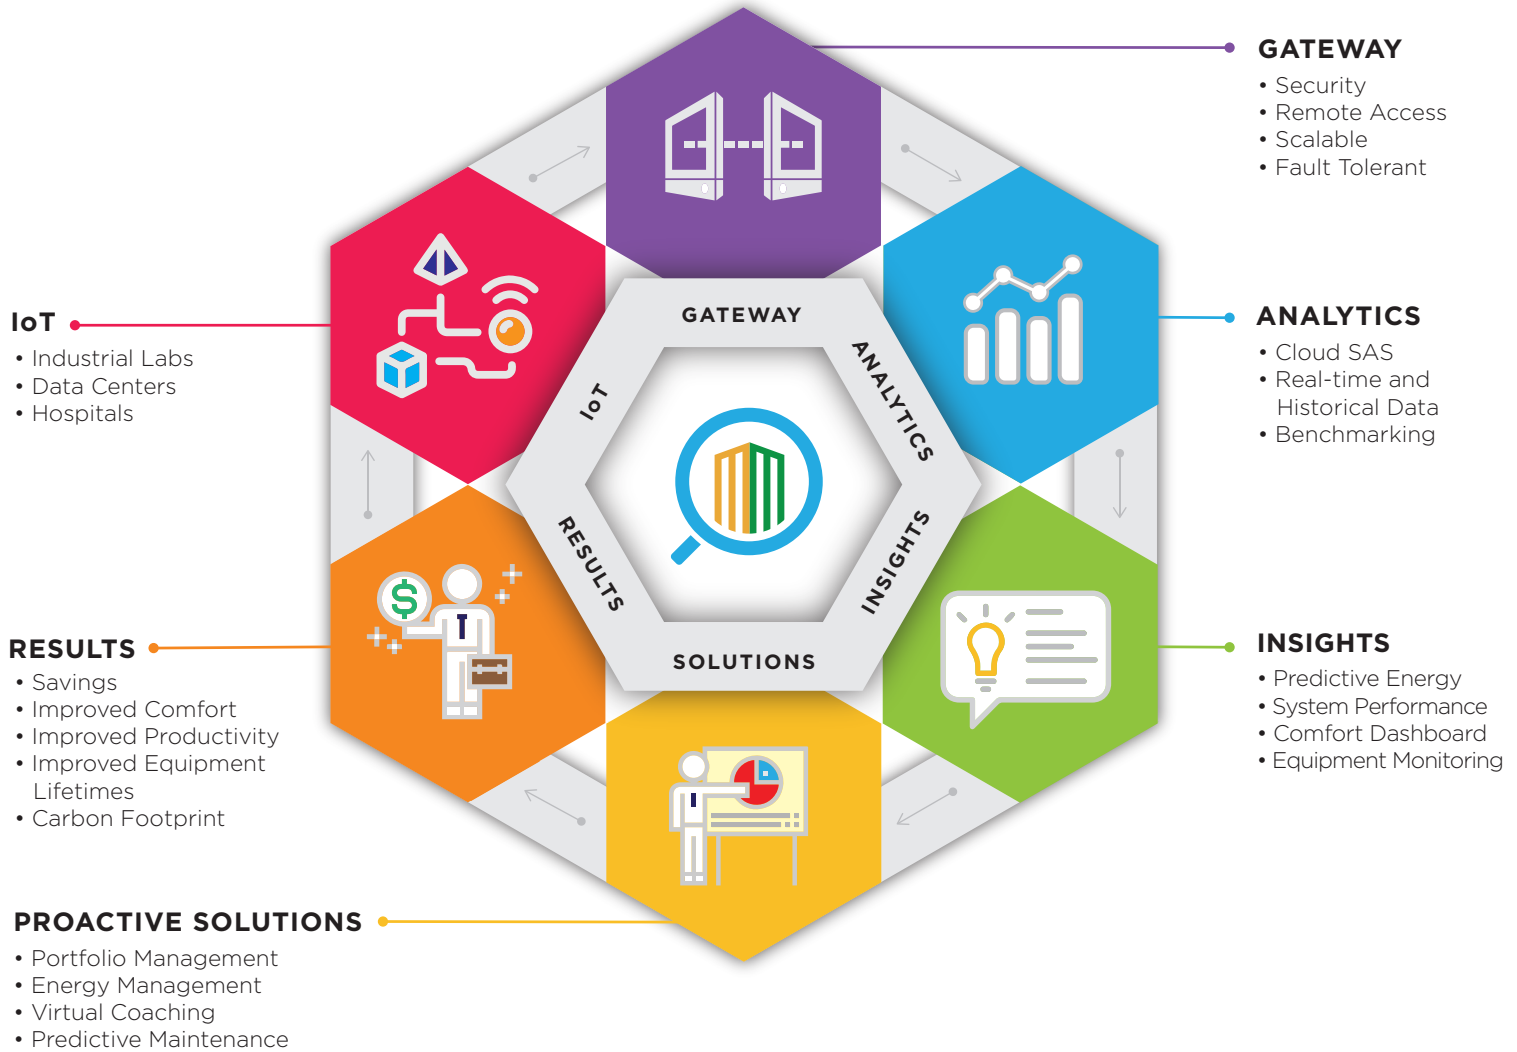

MANAGE

Execute your operations with clarity.

- Prioritize building maintenance based on equipment performance and estimated savings
- Maximize the comfort of your buildings and the productivity of the people in them

START SAVING NOW

The first simple step toward savings is connecting our IOT gateway to your building automation system. Data is securely transferred from your systems to ours. Once connected, our team will use the power of SAS analytics to score your systems and create predictive models based on a combination of trends, historical benchmarks, and current system performance. The final step is to push this information to dashboards for you to begin seeing your savings opportunities. With these insights, you can proactively optimize your building's performance, ensuring continued performance and prevention of downtime.

GATEWAY
- Security
- Remote Access
- Scalable
- Fault Tolerant

IoT
- Industrial Labs
- Data Centers
- Hospitals

ANALYTICS
- Cloud SAS
- Real-time and Historical Data
- Benchmarking

RESULTS
- Savings
- Improved Comfort
- Improved Productivity
