

Depiction of carrier installations of fiber optic cables in public right of ways and 5G on buildings.

**Connected Edge Partners (CEP)** enables cooperation between our building owner partners and telecommunication carriers resulting in the very latest and best in enhanced broadband services and telco connectivity options for tenants located in commercial office buildings and retail centers.

CEP creates new revenue streams for our partners and brings infrastructure improvements to their properties, while also resolving many of the Right of Entry (ROE) issues challenging them and the carriers.

Best of all, using our unique patent pending approach, we do all this at no additional cost to our building owner partners.
