

Aditum is a revolutionary internet management solution designed to bring internet service into a multi-tenant building and cater to the needs of property owners and managers. Aditum offers a reliable fiber internet solution for property managers, allowing them to effortlessly provide tenants with premium high-speed connections while simultaneously generating additional profit.

Why choose Aditum?

- Increased property value and additional revenue: Offering internet service as an amenity can increase the overall value of an MDU/MTU property and provide building owners with additional income by selling tenants internet access.
- Improved tenant satisfaction: Offering high quality internet service can make a property more attractive to prospective tenants and improve the overall satisfaction of existing tenants.
- Enhanced network management and security: Building owners can use tools to monitor and manage the network, to ensure network stability and enhance the overall security of the building, and leverage the infrastructure for additional solutions like door access control.
- Competitive advantage: Offering internet service can differentiate a property from competitors and provide a competitive edge in the rental market.

How does Aditum work?

Aditum's cloud-based platform is user-friendly and easy to deploy, requiring minimal setup time. The platform provides an array of tools and features that enable you to effectively manage and monetize internet access for tenants. With Aditum, landlords and property managers can:

- Provision different internet service tiers, customize policies, and monitor usage in real-time.
- Integrate with to enhance existing infrastructure, making it a cost-effective solution for any multi-tenant internet deployment.
- Leverages Fiber to the Premise and standard Ethernet wiring into tenant spaces.
- Suspend individual accounts in the event of non-payment or failure to follow the previously agreed upon terms of use.
