

TYPICAL INVESTMENT WORKFLOW

Receive OMs and other docs in multiple formats

Sort and discard unwanted deal data

Manually extract key info from OMs to include into the deal pipeline, typically housed over multiple spreadsheets

Search for supporting comps, underwrite in a spreadsheet, and maintain the most up-to-date changes and versions

Create an one-pager for IC in order to approve LOI by manually gathering and summarizing key deal metrics

Manual operations requires more time and resources, which leads to data loss

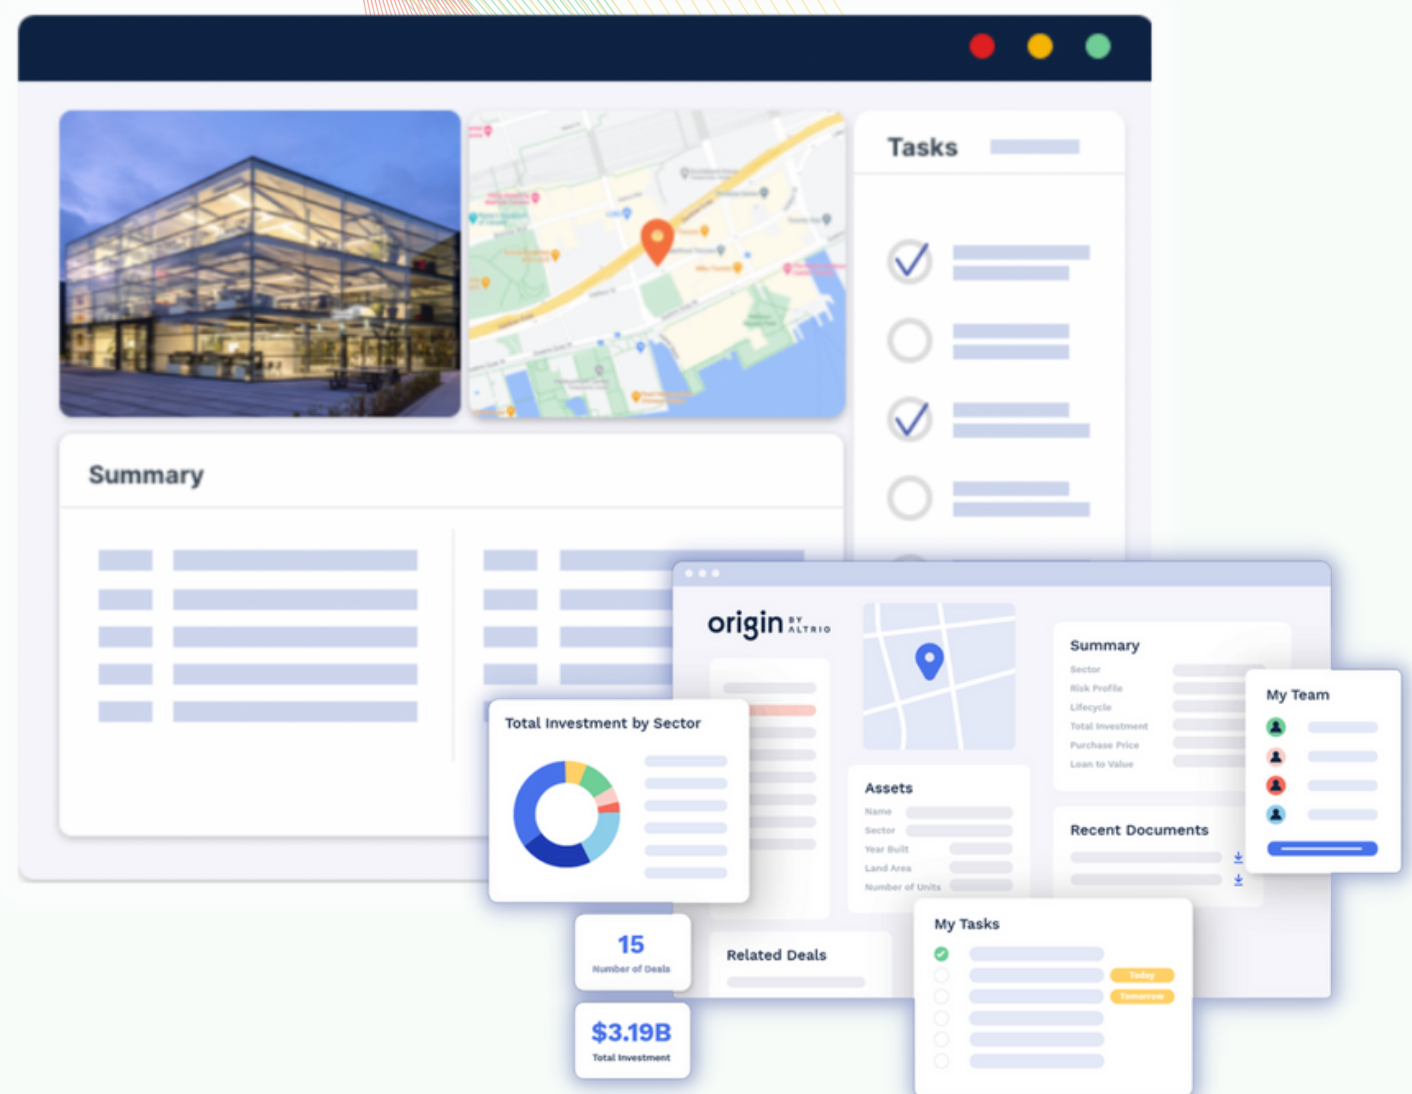

WITH **origin** BY ALTRIO

Forward OMs and other docs in multiple formats

origin BY ALTRIO

Automatically extracts meaningful deal information into a robust database with zero data entry

Gain one source of truth for managing all deal details:

- Pipeline management
- Workflow and task allocation
- Comparable datasets to enhance deal underwriting

Automated operations save time and make the workflow clear
