# APPSPACE

ABOUT APPSPACE

A Software Platform for the Modern Workplace

With an intuitive, all-in-one publishing platform, Appspace makes it easy to drive awareness and reach the entire organization - no matter their location.

The way people work today is changing. Appspace is part of this shift in the workplace experience. From guest check-in to real-time displays, Appspace makes it easy to clearly communicate with employees and guests.

With a unified cloud-based software suite, team members can collaborate cross-department to deliver one standard across the organization - not worry about point products or one-off solutions.

Appspace is a simple, secure, and scalable platform that just works.

FEATURES & FUNCTIONS

How It Works

Appspace Cards make sharing any information effortless. Publish once and view anywhere with brand consistency and flawless formatting. Create or modify cards to meet specific business requirements. Stay on-brand with centrally managed layouts and themes. Use the tools you already know and love to integrate information from any system.

Organize cards into channels and make it simple for content to reach your audience. Publish to devices, online players, and enterprise messaging apps.

The Appspace Cloud

The Appspace platform is fast, secure, and grows with you. With flexible configuration settings and powerful administrative tools, deployments are tailored to you. Industry-leading infrastructure provides optimal performance, redundancy, and failover options around the world. Never worry about software or hardware updates, we do the work for you.

Administration

Appspace is a unified platform that keeps everyone working together. Role-specific tools make it easy to accomplish departmental responsibilities. An open API framework integrates with identity management software, G-Suite, Microsoft Office 365, Atlassian, Salesforce, Facebook, and more.

Flexible Deployments
Deploy from the cloud, on-prem, or a combination of both.

Broad Device Support
Choose from commercial-grade devices you know from the manufacturers you love. Includes Cisco, Crestron, BrightSign, AOPEN, and more.

Global Support
Global 24/7 support from a dedicated Customer Success team.

Appspace App & Devices

Get the same experience & functionality across a broad range of devices. Choose from a Progressive Web App (PWA) hosted in the cloud and accessed by a web browser or a native app installed locally on a device. Bots and macros enable deeper integration.

Platform for the Modern Workplace. Try Appspace for digital signs & video walls, room scheduling, collaboration displays, enterprise TV, kiosks, and more. To learn more visit **appspace.com**
