

ARC Facilities

The App that delivers instant access to building and equipment information

Many solutions leverage the cloud for data access, but you need more than just the cloud to be successful. Facilities professionals choose ARC for the unique benefits we offer, such as searching through conformed As-Buits, continuous organization of information and the ability to get details on equipment or any area of your buildings.

Award-Winning Technology

Five Powerful Facilities Modules

ARC Buildings

Quickly find key building information such as As-Built lists, interactive conformed sets and shut-off locations for gas, water, power and more.

ARC Equipment

Locate, maintain and repair equipment with instant access to maps, O&Ms, warranties, reports and forms.

ARC Emergency

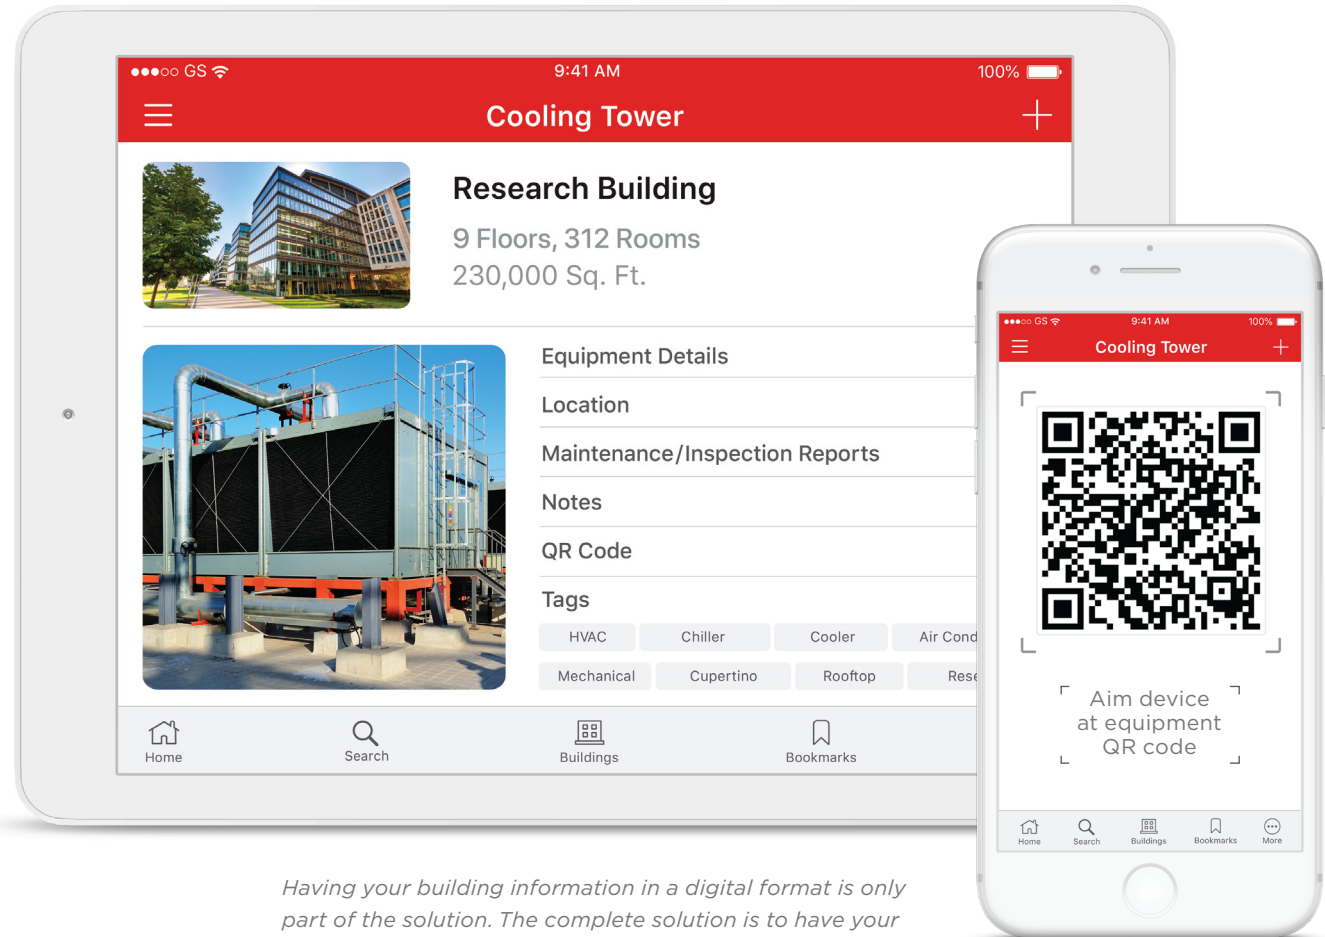

Resolve incidents quickly and safely with mobile access to critical information. Mitigate risks and reduce the threat of damage through informed decisions and coordinated action plans.

ARC Compliance

Streamline compliance audits with instant access to Environment of Care, Life Safety and Statement of Condition Floor Plans.

ARC TI

Review current project details and seamlessly incorporate project closeout documents with a single action.

Having your building information in a digital format is only part of the solution. The complete solution is to have your information mobile, searchable and continuously organized.
