

CONNECTED SENSORS

Always-On Water Monitoring & Flood Prevention Systems

Actionable Water Insights that Achieve True R.O.I

Our next-gen smart water systems provide real-time, measurable insight into water consumption and leaks across your property portfolio to help you save money, mitigate risk and enhance sustainability.

Minimize Utility Costs

Address water consumption and waste to reduce water, gas and electricity bills.

Mitigate Insurance Risk

Eliminate costly insurance claims and deductibles and lower insurance premiums.

Perform Proactive Maintenance

Identify and replace aged or defective plumbing infrastructure and fixtures.

Accelerate Repairs

Pinpoint and repair leaks before they lead to costly damage and downtime.

Reduce Contractor Truck Rolls

Reduce the frequency of costly technician calls and minimize business interruption.

Enhance Sustainability

Reduce your carbon footprint and achieve your sustainability goals.
