

Ensuring Wellness and Performance For Your Buildings & Your People

- Design and implementation of commercial buildings IoT solutions
- End-to-end platform/applications monitoring and support
- Building operations and optimization applications and services
- Building/tenants interaction tools
- Carbon footprint reduction tools and services

For more than 24 years, IBIS has collaborated with early adopters and other innovative building professionals to create connected, sustainable smart buildings. The company's experience in Master Systems Integration (MSI) spans every major facility system and subsystem, with a specific focus on tenants wellness, building performance, monitoring, and analysis
