Energy Smart Buildings

Visualize real-time energy dashboards, reports and building metrics to make fast decisions by connecting IoT devices, systems and people. Turn **Big Data** into actionable information.

Fault Detection and Diagnostics

Analyze and predict equipment faults and energy use with proven rules. Perform real-time **ongoing commissioning**, reduce energy costs, improve occupant comfort and provide a more productive environment.

Unified View of Operations

Create one operational view to **monitor** and **control** all building systems. Use this holistic one view to help optimize the use of space.
