# DIGITAL TWINS
THAT DELIVER
RESULTS

Invicara's Digital Twins bring together the critical building information you need to make your properties run smoother, keep your tenants happy, and lower your operating costs. We offer a unique mix of consulting, technology, and implementation services to deliver:

- **An Asset Twin** – a rich information model of your building – that associates 3D graphics to all relevant data and documents you need to manage your property
- **Intelligent Building Diagnostics** – so you can solve problems quickly and efficiently with minimal disruption to tenants
- **A 360° View of Asset Performance** – giving you insights to reduce energy & maintenance costs, enhance asset life, and optimize capital planning for building systems

Based on projects around the globe, Invicara has identified five levels of Digital Twin maturity. Discover how Digital Twins will transform your business!
