

Increase value and efficiency. Decrease your risk and expense.

Better inform and control your environment with an IoT platform capable of integrating with your operational control systems. Aggregate building and energy data to provide a clearer understanding of resource allocation, efficiency, visibility across audiences, and money-saving opportunities.

[Learn More](#)

Seamless Integration

Harmonize 130+ brands of equipment and connect to on-premises meters, sensors, and systems.

Remote Monitoring & Control

Access, monitor, and control all devices from anywhere via the cloud.

Scalable Data Management

Store unlimited data, track trends, create schedules, and send real-time alarms via text/email.

User-Centric Design

Mobile-first, responsive UI with customizable cards, decks, user access, and permissions for unlimited users.

Flexible Connectivity

Pull operational data to the cloud and integrate with any system through a robust API.
