Instantly connect to any data source and unlock a set of enterprise solutions:

- Digital Twin Creation with ML
- 100+ API Integrations
- Independent Data Layer (IDL)
- Built-In Analytics and Reporting
- Energy Management & Optimization
- Remote Command & Control
- Device and System Graphics
- Schedule Management
- Fault Detection & Diagnostics (FDD)
- Digital Commissioning
- Auto-Provisioned Optimized Start Stop
- Workflow Automation
- Mobile and Web Apps
- Single Sign On (SSO)
- Modular Platform Design
- Easy User Management

OUTCOMES

- Extending equipment lifespan through continuous digital commissioning;
- Avoiding inefficiency & unnecessary operation through preventive & predictive maintenance;
- Operational efficiency & more effective use of time;
- Streamline service contracts & equipment upgrades;
- Enterprise process for your deployment teams.
