

McKinstry is a national leader in designing, constructing, operating and maintaining high-performing buildings.

From new construction and ongoing operations to adaptive reuse, energy retrofits and advanced renewable energy systems, McKinstry provides a single point of accountability across the entire building lifecycle. We focus on people and outcomes to ensure the built environment serves owners, operators and occupants alike.

McKinstry works with school districts, universities, municipalities, hospitals and private companies nationwide. Our clients care about long-term planning, saving energy and driving out waste, and have sophisticated facilities that require nothing but the best.

America's built environment squanders energy, labor and construction and maintenance costs. At McKinstry, we don't. We're your trusted partner for the life of your building.
