
BUILDING LIFE CYCLE SOLUTIONS

Michael Baker International is a trusted provider of multidiscipline engineering, design and technology consulting services.

We recognize that building owners and operators face a multitude of challenges to keep their structures operating securely and efficiently. By partnering with Michael Baker, you will have best-in-class advisors to support the ever-changing needs of your building infrastructure. We seamlessly integrate our service offerings – architecture, planning, design, engineering, technology and more – to provide unsurpassed holistic, sustainable and technology-forward solutions.

From designing smart buildings to reimagining existing spaces, we provide the full spectrum of services to solve challenges from multiple vantage points and build operational resilience into your structure.
