

Reducing energy. Reducing cost.

Market leading cloud IoT solutions that reduce energy use and minimize waste

For over 30 years, NexRev has developed and deployed innovative solutions to help companies across the USA to reduce building and energy waste.

Headquartered in **Dallas, Texas** with offices across the **USA, Canada and Mexico**, NexRev currently services **20% of the USA's Fortune 100** companies – and has long-standing relationships with some of the world's best-known organizations.

NexRev - what we do

Reducing operational waste & energy use

We help our customers to reduce operational waste and lower their energy use and costs. We offer an **integrated portfolio** that delivers benefits – from a single site to a complex, multi-location deployment, helping organizations meet their energy goals.

We provide an integrated solution suite that enables our customers to **systematically target energy waste reduction**, via remote devices and a complete connectivity framework. Customers can take immediate action with our DrivePak solution for **HVAC motor speed optimization** - and connect all sites to our centrally managed, **cloud-based Freedom control center**, adding new capabilities to realize a complete building and energy management solution.

NexRev customers benefit from:

- Enhanced customer experience with longer dwell times
- Improved employee productivity and satisfaction
- OSHA certified, licensed W2 technicians and support
- Significant, measurable reductions to carbon footprint

Actual customer results

Major US Retailer

131 stores/ 1300 units

\$3,290,000

Savings per year

Leading US Theater

300 sites/ 1300 units

48,000,000

kWh reduction

Home Goods Retailer

300 stores/ 1500 units

22.4%

Energy reduction

Simplicity and efficiency

NexRev has designed and developed our solutions on open hardware and software which can be operated by the building owner, operator, facility manager or 3rd party.

- Openness and interoperability
- Secure and encrypted data
- Clear, intuitive reporting and interfaces
- Scalable to cover your entire footprint

"The NexRev solution reduced our energy spend by more than 25% while improving store comfort, giving Conn's visibility of saving measures as we move forward with growth."

Senior Director R.E. Design, Construction, Facilities

NexRev - intelligent by design

Proven to significantly cut energy-related costs

Our intelligent solutions enable balanced automation that provide both localized control and centralized management with real-time data empowerment.

- Analytics for truly informed decision-making
- Detailed insights through our user-friendly interface
- Automated fault & outlier detection
- Create instant notifications and alarms
- Baseline and normalizing
- Understand and benchmark facility performance
- Create and track KPIs
- Portfolio-wide performance tracking

NexRev Service and Support

We provide a complete range of support, managed and professional services to help you make the most of your investments in our solutions, delivering the rapid ROI you need to make immediate and lasting savings.

Over 1,000,000 devices, \$1 Billion saved for customers nationwide
