

Procore is for Owners.

Take control of your construction projects with visibility into every step of the process. Get access to critical project information and equip your team with crucial insights and competitive efficiencies.

Own your data.

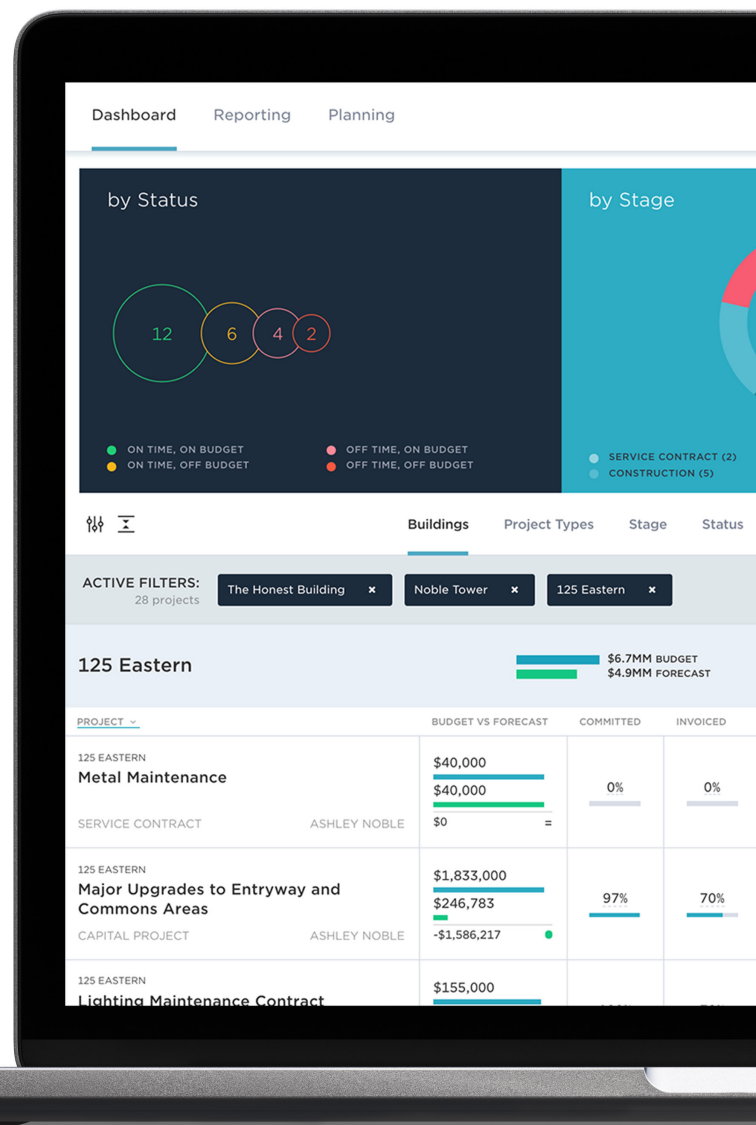

Stay connected to the actionable insights you need to make smart management decisions—all while maintaining the highest standards of data security.

Standardize across projects.

Align best practices and centralize workflows across each project. Optimize your processes and learn from each project for consistent quality that improves asset value.

Mitigate risk.

Our software helps protect yourself against surprise costs, schedule delays, and any potential disputes with real-time updates and unlimited access to historical information.

Get results that pay for themselves.

“The return on investment math is simple—even a tiny fraction of savings on one bid would pay for the platform. Multiply that by a few hundred projects per year, portfolio-wide, and it’s clear that the decision to bring on this platform was an easy one.”

DAN KINDBERGH
BROOKFIELD PROPERTIES

Make an investment in efficiency.

“We used Procore extensively to help control documents and information—to manage the project from a distance. Procore allowed us to minimize site travel and yet remain informed on project progress.”

BRIAN SCHNEIDER
ULINE

Grow the business you want.

“Procore has transformed our entire project management practice and improved the quality of our product, the quality of our work environment, the happiness and experience of our team, and ultimately the impact of our brand.”

PETE ZAFROS
EYA

You own the portfolio. You should own the process.

Procore was built to provide solutions to the challenges unique to your business.

Project Management

Get done faster with real-time communication across project teams. Have access to all the information you need to manage critical action items from any device.

Portfolio Financials

Ensure that capital and construction projects finish on-time and on-budget with sourcing, bid management, cost tracking, and financial controls all in one platform.

Capital Planning

Forecast faster and more accurately with a single source of truth and leverage data-driven insights to update your capital plans. Understand how you're tracking in real time with improved forecasting from portfolio-wide budget updates.
