

TOSIBOX

Safeguarding Critical
OT Environments with a
Purpose-Built
Cybersecurity Platform

-  Do it easily.
-  Do it automatically.
-  Do it cybersecurely.

Challenges

Tosibox Solves:

Data breach risks, complex networks, IT/OT vulnerabilities, and secure remote access. In 2024, 75% of businesses using Tosibox reported improvement in security and remote access; 68% experienced a reduction in downtime (Tosibox Survey).

Solutions

Tosibox Delivers:

- Security:** Advanced firewall, 256-bit AES encryption, device and software MFA.
- Management:** Complete data and user access control, IT/OT segmentation, audit logs.
- Integration:** Layer 2/3 support, cross-device compatibility.

Benefits

Tosibox Provides:

- Minimized downtime** with quick deployment.
- Reduced cybersecurity risks** with multi-layered security.
- Simplified remote access** across devices and networks.
- Scalability** with no public static IPs or inbound ports.

Certified and Trusted by Industry Leaders

“ With Tosibox, the complex web of systems turned into a streamlined, straightforward way of operating our sites. Time and money were saved because of the secure remote access we were able to grant our technicians as well.

- Vice President of Information Technology, Select Energy

Who Are We?

Tosibox is a global leader in secure, scalable connectivity and cybersecurity solutions, providing businesses with seamless, remote, and encrypted access to critical systems and devices worldwide.

Founded in 2011, with headquarters in both Finland and U.S, our patented technology ensures smooth operations across diverse networks while maintaining top security standards.
