

Your Project Deserves Digital Electricity™

Circa

LAS VEGAS, NV | 2021
Massive Casino and Resort with
VoltServer Powering 5G DAS,
Wi-Fi, and 777 High-Tech Rooms

VoltServer is powering **over 1,000 venues worldwide** including major stadiums, luxury hotels, rail systems, innovative farms, and even a high-tech Las Vegas casino resort.

VoltServer's sustainable, efficient, reliable, and cost-effective solutions enable your project not only to comply with standards now, but benefit in countless ways for years to come. VoltServer's patented and proven Digital Electricity™ really is that much better. It offers the power and distance of AC and the safety of data cables, delivering significantly more power and at greater distances than PoE, while using the same low-voltage wiring practices.
