PremiseHQ Unveils AI-Powered Digital Employees at Realcomm 2024

Toronto – June 9, 2024 – [PremiseHQ](), a pioneer in AI-powered PropTech solutions, is thrilled to announce the launch of its AI Digital Employees. These virtual assistants are poised to revolutionize property management, offering a transformative potential to optimize efficiency, elevate tenant satisfaction, and reshape the property management landscape.

PremiseHQ's Digital Employees – Lynn, Alex, and Quinn – address the ever-growing need for property management teams to streamline operations, enhance the tenant experience, and make data-driven decisions. Leveraging artificial intelligence, these digital employees automate tasks, personalize tenant experiences, and generate real-time operational insights, empowering property managers to focus on strategic initiatives and tenant well-being.

"The property management industry is ripe for innovation, and the adoption of AI in property management is not a question of if, but when," says Rafi Dowla, CEO of PremiseHQ. "Our AI Digital Employees are the fastest way to unlock all of the benefits of AI, from driving efficiency to scaling your operations to increasing your NOI."

PremiseHQ's AI Digital Employees are not just innovative, they're also user-friendly. They come fully trained and ready to work, ensuring a seamless integration into your operations. This means you can start reaping the benefits of their instant productivity without needing extensive onboarding.

Experience the Power of AI Digital Employees at Realcomm
PremiseHQ will showcase its AI Digital Employees at Realcomm 2024, June 19-21, in Tampa, Florida. Interact with Lynn, your personal conference concierge. Lynn can answer your questions about the event, recommend relevant sessions, and even provide personalized recommendations. Interact with her via voice or text chat and experience the future of property management firsthand.

Visit PremiseHQ at booth #2118 or check out [premisesaas.com]() for more information.
